

DC single-acting solenoids

1

Product group

G FC

Function

- Push and pull type
- Almost linear magnetic force vs. stroke characteristic

Construction

- Fastening via 2 resp. 4 threaded holes
- Armature bearing:
 - Maintenance free position
 - High service life
 - Armature surface nickel-plated
- Stroke modification by adjustment of the hex nuts
- Insulation materials of the exciter coil correspond to thermal class F
- Electrical connection via flat plug A 6.3 x 0.8 DIN 46244
- Protection class according to DIN VDE / EN 60529 when it is properly installed: IP 00

Application examples

- Office machines, textile machines
- Measuring and control technology, building of automats

Options

- Please contact us for application related solutions

Standards

- Design and testing according to VDE 0580
- Production according to ISO 9001

Fig. 1: Type G FC X 040 X00 B12

Fig. 2: force vs. stroke characteristic within the nominal stroke

Technical data

G FC	025					030

Solenoid weight m _M (kg)	0,85					1,3				

¹⁾ Almost linear characteristic

²⁾ Achievable by adjustment of the nuts on the armature rod

Dimensional drawing

Elastomer washer for silencing
For external loads or additional restoring forces the customer should design an external impact damping.

Surface: case and core galvanised

t3	6	6	7	8	8	10
s	4	5	7	8	10	12

¹⁾ We ask you to please do not exceed the screw depth a, because this could lead to damage of the coil.

* For sizes 050 and 060 4 threaded bores

²⁾ Dimensions apply for nominal stroke

Notes on the tables

The magnetic force values indicated in the table refer to 90 % of the rated voltage ($U_N = \text{---} 24 \text{ V}$, deviations of the magnetic force may occur for other voltages) and the normal operating temperature.

Due to natural dispersion the magnetic force values may deviate by approx. $\pm 10 \%$ from the table values.

The normal operating temperature is based on:

- Mounting on heat-insulating base
- Rated voltage $\text{---} 24 \text{ V}$
- Operating mode S1 (100%) up to S3 5 %
- Reference temperature 35° C

Rated voltage

Rated voltage $\text{---} 24 \text{ V}$, for types from size 035 the exciter coil can be adjusted to a rated voltage of $\text{---} 250 \text{ VDC}$ on request.

The devices in size 25 and 30 correspond to protection class III. Electrical equipment of protection class III may be only connected to low voltage systems (PELV, SELV)(IEC 60364-4-41). The design limit of the equipment is a rated voltage not higher than 120 V (EN 61140:2002) with DC.

On request we are pleased to check to what extent the delivery of higher rated voltages is possible as special solutions by agreement.

Type code

Type	Size = width	Voltage, admissible duty cycle for rated voltage 24V
G FC X 025 X00 B12	25mm	24V DC (max. 120V) Without protective conductor connection, protection class III
G FC X 030 X00 B12	30mm	
G FC X 035 X00 B12	35mm	24V DC, 196V DC, 205V DC, Protection class I
G FC X 040 X00 B12	40mm	
G FC X 050 X00 B12	50mm	
G FC X 060 X00 B12	60mm	

Order example

Type	G FC X 025 X00 B12
Voltage	$\text{---} 24 \text{ V DC}$
Operating mode	S1 (100 %)

Information and remarks concerning European directives can be taken from the correspondent information sheet which is available under *Produktinfo.Magnet-Schultz.com*.

Note on the RoHS Directive

According to our current state of knowledge the devices pictured in this document do not contain any substances in concentration values or applications for which putting into circulation with products manufactured from them is prohibited in accordance to RoHS.

Please make sure that the described devices are suitable for your application. Supplementary information concerning its proper installation can be taken also from the  -Technical Explanation, the effective DIN VDE0580 as well as the relevant specifications.

This part list is a document for technically qualified personnel.

The present publication is for informational purposes only and shall not be construed as mandatory illustration of the products unless otherwise confirmed expressively.

Specials designs

Please do not hesitate to ask us for application-oriented problem solutions. In order to find rapidly a reliable solution we need complete details about your application conditions. The details should be specified as precisely as possible in accordance with the relevant  -Technical Explanations.

If necessary, please request the support of our corresponding technical office.
